Subject Index of Volume 64

Acetoxylation
enantioselective Cu-catalysed allylic, of cyclohexene, 381
Addition
highly enantioselective, of diethylzinc to aldehydes catalysed by chiral s-amino-t-alcohols, L27
nucleophilic; polymer-supported catalysts in, of n-butanol to isocyanates, 15
Adsorption
transition metal bonding functions and their application in adsorptions and catalytic reactions:
characterization of CO adsorption — bonding, IR spectra, surface species population and adsorption heats, 119
effect of metal valence band and periodic trend of CO σ–π bonding functions on transition metals, 103
micromechanism of CO chemisorption and new concept of σ–π coordination, 85
theoretical model, 53
Alcohols
amorphous alloy catalysis: dehydrogenation of 2-propanol on amorphous $Cu_{61}Zr_{39}$ alloy precursors, 41
highly enantioselective addition of diethylzinc to aldehydes catalysed by chiral s-amino-t-alcohols, L27
hydrogenolysis of aromatic glycols: example of multifunctional catalysis by $HCo(CO)_4$, 283
hydrogen photogeneration from aqueous solutions of, by Fe^{3+} ion, 155
polymer-supported catalysts in nucleophilic addition of n-butanol to isocyanates, 15
selective inhibition of methanol dehydrogenase from *Methylosinus trichosporium* (OB3b) by cyclopropanol, L23
selective oxidation of primary allylic alcohols to α,β-unsaturated aldehydes using molecular oxygen and fine metal particle catalysts generated from Rh carbonyl clusters, L7
Aldehydes
formaldehyde and formates as sources of synthesis gas via Ru-catalysed decomposition reactions, 337
highly enantioselective addition of diethylzinc to, catalysed by chiral s-amino-t-alcohols, L27
hydrogen of cinnamaldehyde over Ru/C catalysts: effect of Ru particle size, 237
selective oxidation of primary allylic alcohols to α,β-unsaturated aldehydes using molecular oxygen and fine metal particle catalysts generated from Rh carbonyl clusters, L7
Alkanes
effect of cyclopropane treatment of *Methylosinus trichosporium* (OB3b) for:
lower alkane oxidation, 373
n-butane hydroxylation, L35
methane: theoretical EHT study of oxidative coupling of, on pure MgO and MgO doped with Li and Na, 191
reaction mechanism of propane hydroxylation with *Mehylosinus trichosporium* (OB3b), L39
Alkenes, Olefins
dinitrosylmolybdenum catalytic systems, new, for olefin metathesis, 171
enantioselective Cu-catalysed allylic acetoxylation of cyclohexene, 381
poly(1,4-naphthalene) as support of catalytically active Os clusters for olefin isomerization, 213
role of iron(II) phthalocyanine as catalyst in Wacker oxidation of 1-decene, 291
Alloys
amorphous alloy catalysis: dehydrogenation of 2-propanol on amorphous $Cu_{61}Zr_{39}$ alloy precursors, 41

Elsevier Sequoia/Printed in The Netherlands

Allylation
catalytic, of 1-trimethylsilyloxycyclopent-1-ene into 2-allylcyclopentanone over Pd supported on silica, 201
Aromatic compounds
asymmetric oxidation of sulphides with FeT($\alpha,\beta,\alpha,\beta$-Nap)PPCl/PhIO/Im system, L19
carbonylation of nitrobenzene to phenyl isocyanate and methyl carbamate catalysed by Pd and Rh activated by chelating nitrogen donor ligands, 179
catalysis of water–gas shift reaction by supported $Ru_3(CO)_{12}$ with 2,2′-bipyridine, 163
co-cyclotrimerization of hexynes and phenylacetylene with Nb(V) chloride as catalyst, 269
hydrogen of cinnamaldehyde over Ru/C catalysts: effect of Ru particle size, 237
hydrogenolysis of aromatic glycols: example of multifunctional catalysis by $HCo(CO)_4$, 283
nitration of, with benzoyl nitrate on zeolites, L31
O-atom transfer biomimetic oxidation of benzoin in presence of monooxomolybdenum(IV) thiolate complexes, 247
oxidation of methyl to formyl group in 2,3-dihydro-2,2,4-trimethyl-1H-1,5-benzodiazepine by O_2 in presence of metal ions, L15
poly(1,4-naphthalene) as support of catalytically active Os clusters for olefin isomerization, 213
preparation and characterization of tetra(4-pyridyl)porphyrinatomanganese(III) cation supported covalently on poly(siloxane), 133
production and reactions of xylenes over H-ZSM5, 23
role of iron(II) phthalocyanine as catalyst in Wacker oxidation of 1-decene, 291

Carbonylation
of nitrobenzene to phenyl isocyanate and methyl carbamate catalysed by Pd and Rh activated by chelating nitrogen donor ligands, 179

Chemisorption
transition metal bonding functions and their application in adsorptions and catalytic reactions: micromechanism of CO chemisorption and new concept of σ–π coordination, 85
Cinnamaldehyde
hydrogen of, over Ru/C catalysts: effect of Ru particle size, 237
Clays
spectroscopic characterization of some iron-containing pillared clays, 221
Clusters
catalytically active Os: poly(1,4-naphthalene) as support of, for olefin isomerization, 213
Rh carbonyl; selective oxidation of primary allylic alcohols to α,β-unsaturated aldehydes using molecular oxygen and fine metal particle catalysts generated from, L7
CO
transition metal bonding functions and their application in adsorptions and catalytic reactions:
characterization of CO adsorption — bonding, IR spectra, surface species population and adsorption heats, 119
effect of metal valence band and periodic trend of CO σ–π bonding functions on transition metals, 103
micromechanism of CO chemisorption and new concept of σ–π coordination, 85
Cobalt
hydrogenolysis of aromatic glycols: example of multifunctional catalysis by $HCo(CO)_4$, 283
selective isomerization of epoxides catalysed by $Sn[Co(CO)_4]_4$, L11
Co-cyclotrimerization
of hexynes and phenylacetylene with Nb(V) chloride as catalyst, 269
Copper
amorphous alloy catalysis: dehydrogenation of 2-propanol on amorphous $Cu_{61}Zr_{39}$ alloy precursors, 41
enantioselective Cu-catalysed allylic acetoxylation of cyclohexene, 381
thermal analysis of catalyst precursors: influence of support and metal precursor on reducibility of Cu catalysts, 305

Decomposition
formaldehyde and formates as sources of synthesis gas via Ru-catalysed, reactions, 337
photocatalytic properties of [polymerized n-butyl-*o*-titanate + hydrogen peroxide] complex on, of water, 1
Dehydrogenation
of 2-propanol on amorphous $Cu_{61}Zr_{39}$ alloy precursors; amorphous alloy catalysis, 41
Dimethyl oxalate
selective reduction of, by Ru carbonyl carboxylates in homogeneous phase, 257

Epoxides
selective isomerization of, catalysed by $Sn[Co(CO)_4]_4$, L11
Esterification
stearic acid, catalysed by titanates: comparative study of homogeneous and heterogeneous systems, L1

Formaldehyde
and formates as sources of synthesis gas via Ru-catalysed decomposition reactions, 337
Formates
and formaldehyde as sources of synthesis gas via Ru-catalysed decomposition reactions, 337

Hexynes
and phenylacetylene: co-cyclotrimerization of, with Nb(V) chloride as catalyst, 269
Hydrodesulphurization
quantum chemical study of MoS_2, catalysts, 321
Hydroformylation
new trends in kinetics of, of vinyl acetate using Rh complex catalysts, 143
Hydrogen
of cinnamaldehyde over Ru/C catalysts: effect of Ru particle size, 237
photogeneration from aqueous solutions of alcohols by Fe^{3+} ion, 155
Hydrogenolysis
of aromatic glycols: example of multifunctional catalysis by $HCo(CO)_4$, 283
Hydroxylation
n-butane: effect of cyclopropane treatment of *Methylosinus trichosporium* (OB3b) for, L35
propane: reaction mechanism of, with *Methylosinus trichosporium* (OB3b), L39

Iron
asymmetric oxidation of sulphides with FeT($\alpha,\beta,\alpha,\beta$-Nap)PPCl/PhIO/Im system, L19
hydrogen photogeneration from aqueous solutions of alcohols by Fe^{3+} ion, 155
role of iron(II) phthalocyanine as catalyst in Wacker oxidation of 1-decene, 291
spectroscopic characterization of some iron-containing pillared clays, 221
Isocyanates
polymer-supported catalysts in nucleophilic addition of n-butanol to, 15
Isomerization
olefin: poly(1,4-naphthalene) as support of catalytically active Os clusters for, 213
selective, of epoxides catalysed by $Sn[Co(CO)_4]_4$, L11

Laser
-initiated catalytic polymerization of vinyl monomer by metal carbonyls, 277
Lithium
and Na: theoretical EHT study of oxidative coupling of methane on pure MgO and MgO doped with, 191

Magnesium
theoretical EHT study of oxidative coupling of methane on pure MgO and MgO doped with Li and Na, 191
Manganese
preparation and characterization of tetra(4-pyridyl)porphyrinatomanganese(III) cation supported covalently on poly(siloxane), 133
Metal carbonyls
laser-initiated catalytic polymerization of vinyl monomer by, 277
Metal valence band
transition metal bonding functions and their application in adsorptions and catalytic reactions: effect of metal

valence band and periodic trend of CO σ–π bonding functions on transition metals, 103
Metathesis
olefin: new dinitrosylmolybdenum catalytic systems for, 171
Methanol dehydrogenase
selective inhibition of, from *Methylosinus trichosporium* (OB3b) by cyclopropanol, L23
Methylosinus trichosporium (OB3b)
effect of cyclopropane treatment of, for lower alkane oxidation, 373
effect of cyclopropane treatment of, for n-butane hydroxylation, L35
reaction mechanism of propane hydroxylation with, L39
selective inhibition of methanol dehydrogenase from, by cyclopropanol, L23
Molybdenum
dinitrosylmolybdenum catalytic systems, new, for olefin metathesis, 171
O-atom transfer biomimetic oxidation of benzoin in presence of monooxomolybdenum(IV) thiolate complexes, 247
quantum chemical study of MoS_2 hydrosulphurization catalysts, 321

Niobium
co-cyclotrimerization of hexynes and phenylacetylene with Nb(V) chloride as catalyst, 269
Nitration
of aromatic compounds with benzoyl nitrate on zeolites, L31
Nucleophilic addition
polymer-supported catalysts in, of n-butanol to isocyanates, 15

Olefins: see Alkenes
Osmium
poly(1,4-naphthalene) as support of catalytically active Os clusters for olefin isomerization, 213
Oxidation
asymmetric, of sulphides with FeT-($\alpha,\beta,\alpha,\beta$-Nap)PPCl/PhIO/Im system, L19
lower alkane: effect of cyclopropane treatment of *Methylosinus trichosporium* (OB3b) for, 373
of methyl to formyl group in 2,3-dihydro-2,2,4-trimethyl-1H-1,5-benzodiazepine by O_2 in presence of metal ions, L15
O-atom transfer biomimetic, of benzoin in presence of monooxomolybdenum(IV) thiolate complexes, 247
selective, of primary allylic alcohols to α,β-unsaturated aldehydes using molecular oxygen and fine metal particle catalysts generated from Rh carbonyl clusters, L7
Wacker: role of iron(II) phthalocyanine as catalyst in, of 1-decene, 291
Oxidative coupling
theoretical EHT study of, of methane on pure MgO and MgO doped with Li and Na, 191
Oxygen
-atom transfer biomimetic oxidation of benzoin in presence of monooxomolybdenum(IV) thiolate complexes, 247
oxidation of methyl to formyl group in 2,3-dihydro-2,2,4-trimethyl-1H-1,5-benzodiazepine by, in presence of metal ions, L15
selective oxidation of primary allylic alcohols to α,β-unsaturated aldehydes using molecular oxygen and fine metal particle catalysts generated from Rh carbonyl clusters, L7

Palladium
carbonylation of nitrobenzene to phenyl isocyanate and methyl carbamate catalysed by Pd and Rh activated by chelating nitrogen donor ligands, 179
catalytic allylation of 1-trimethylsilyloxycyclopent-1-ene into 2-allylcyclopentanone over Pd supported on silica, 201
Photocatalytic properties
of [polymerized n-butyl-*o*-titanate + hydrogen peroxide] complex on decomposition of water, 1
Photogeneration
hydrogen, from aqueous solutions of alcohols by Fe^{3+} ion, 155
Platinum
Pt–KL zeolite catalysts of different preparation: catalyst characterization, 361

Polymer
photocatalytic properties of [polymerized n-butyl-*o*-titanate + hydrogen peroxide] complex on decomposition of water, 1
-supported catalysts in nucleophilic addition of n-butanol to isocyanates, 15
Polymerization
laser-initiated catalytic, of vinyl monomer by metal carbonyls, 277
Porphyrin
preparation and characterization of tetra(4-pyridyl)porphyrinatomanganese(III) cation supported covalently on poly(siloxane), 133

Quantum chemical study
of MoS_2 hydrosulphurization catalysts, 321

Reducibility
influence of support and metal precursor on, of Cu catalysts; thermal analysis of catalyst precursors, 305
Reduction
selective, of dimethyl oxalate by Ru carbonyl carboxylates in homogeneous phase, 257
Rhodium
carbonylation of nitrobenzene to phenyl isocyanate and methyl carbamate catalysed by Pd and Rh activated by chelating nitrogen donor ligands, 179
selective oxidation of primary allylic alcohols to α,β-unsaturated aldehydes using molecular oxygen and fine metal particle catalysts generated from Rh carbonyl clusters, L7
trends, new, in kinetics of hydroformylation of vinyl acetate using Rh complex catalysts, 143
Ruthenium
catalysis of water–gas shift reaction by supported $Ru_3(CO)_{12}$ with 2,2′-bipyridine, 163
formaldehyde and formates as sources of synthesis gas via Ru-catalysed decomposition reactions, 337
hydrogen of cinnamaldehyde over Ru/C catalysts: effect of Ru particle size, 237
selective reduction of dimethyl oxalate by Ru carbonyl carboxylates in homogeneous phase, 257

Silicon
catalytic allylation of 1-trimethylsilyloxycyclopent-1-ene into 2-allylcyclopentanone over Pd supported on silica, 201
characterization of ZrO_2–SiO_2 unmodified or modified with H_2SO_4 and acid catalysis, 349
preparation and characterization of tetra(4-pyridyl)porphyrinatomanganese(III) cation supported covalently on poly(siloxane), 133
Sodium
and Li: theoretical EHT study of oxidative coupling of methane on pure MgO and MgO doped with, 191
Spectroscopy
spectroscopic characterization of some iron-containing pillared clays, 221
transition metal bonding functions and their application in adsorptions and catalytic reactions: characterization of CO adsorption — bonding, IR spectra, surface species population and adsorption heats, 119
Stearic acid
esterification catalysed by titanates: comparative study of homogeneous and heterogeneous systems, L1
Sulphur
asymmetric oxidation of sulphides with FeT($\alpha,\beta,\alpha,\beta$-Nap)PPCl/PhIO/Im system, L19
O-atom transfer biomimetic oxidation of benzoin in presence of monooxomolybdenum(IV) thiolate complexes, 247
quantum chemical study of MoS_2 hydrosulphurization catalysts, 321
Sulphuric acid
characterization of ZrO_2–SiO_2 unmodified or modified with H_2SO_4 and acid catalysis, 349
Surface species population
transition metal bonding functions and their application in adsorptions and catalytic reactions: characterization of CO adsorption — bonding, IR spectra, surface species population and adsorption heats, 119

Synthesis gas
formaldehyde and formates as sources of, via Ru-catalysed decomposition reactions, 337

Thermal analysis
of catalyst precursors: influence of support and metal precursor on reducibility of Cu catalysts, 305
Tin
selective isomerization of epoxides catalysed by $Sn[Co(CO)_4]_4$, L11
Titanium
photocatalytic properties of [polymerized n-butyl-*o*-titanate + hydrogen peroxide] complex on decomposition of water, 1
stearic acid esterification catalysed by titanates: comparative study of homogeneous and heterogeneous systems, L1
Transition metal bonding functions
and their application in adsorptions and catalytic reactions:
characterization of CO adsorption — bonding, IR spectra, surface species population and adsorption heats, 119
effect of metal valence band and periodic trend of CO σ–π bonding functions on transition metals, 103
micromechanism of CO chemisorption and new concept of σ–π coordination, 85
theoretical model, 53

Vinyl acetate
new trends in kinetics of hydroformylation of, using Rh complex catalysts, 143
Vinyl monomer
laser-initiated catalytic polymerization of, by metal carbonyls, 277

Water
catalysis of water–gas shift reaction by supported $Ru_3(CO)_{12}$ with 2,2′-bipyridine, 163
photocatalytic properties of [polymerized n-butyl-*o*-titanate + hydrogen peroxide] complex on decomposition of, 1

Xylenes
production and reactions of, over H-ZSM5, 23

Zeolite(s)
nitration of aromatic compounds with benzoyl nitrate on, L31
production and reactions of xylenes over H-ZSM5, 23
Pt–KL, catalysts of different preparation: catalyst characterization, 361
Zinc
highly enantioselective addition of diethylzinc to aldehydes catalysed by chiral s-amino-t-alcohols, L27
Zirconium
amorphous alloy catalysis: dehydrogenation of 2-propanol on amorphous $Cu_{61}Zr_{39}$ alloy precursors, 41
characterization of ZrO_2–SiO_2 unmodified or modified with H_2SO_4 and acid catalysis, 349
